

Previous Meeting Summary

FALL 2016 PSMC MEETING

1 – 3 November 2016

Honeywell – Torrance, CA

LMI

***Chair, Parts Management Tools and Data Subcommittee
25 April 2017***

General Session Presentations

“Welcome”

Honeywell Host

“DSPO Perspective on Parts Management”

DSPO Director

“Cyber Security”

University of Connecticut

“SWISS Panel”

SAE & XSB

“Prime Contractor Parts Management”

Boeing

General Session Presentations

(Continued)

“Counterfeit Electronic Part Trends / New DFARS Clauses”

Navy

“Space & Missile Systems Center (SMC) Parts Management”

USAF/SMC

“Air Force Parts Management”

USAF/AFMC

“Displays and IC Trends”

IHS

“Common Parts Catalog / Commonality Working Group”

National Shipbuilding Research Program

General Session Presentations

(Continued)

“Update on Additive Manufacturing: Impact on Parts Management”

LMI

“DoD’s DMSMS Strategic Objectives”

DSPO

“Parts Analyses and Supplier Collaboration”

IDA

“DMSMS 2016 Plans”

BAE

General Session Presentations

(Continued)

“BOM Intelligence Demo”

IHS

“Comparison of SAE-AS5553 Rev A / Rev B; Industry Standards / Impact on Parts Management”

Boeing

“BGA Reballing Standard ”

Boeing

“GIDEP Update”””

GIDEP

“Honeywell Facility Tour”

Honeywell

SE, Procedures, Contracting, Education Subcommittee

-
- **Discussed plans to update MIL-STD-3018. Reviewed comments for Change Notice 3, many editorial.**
 - **Discussed preliminary definitions for alternate and substitute parts.**
 - **Revised narrative in Paragraph 5.2, Order of Preference, Part Selection Process Criteria.**
 - **Updated hyperlinks and references.**
 - **Cleaned up wording and content in section on parts management critical issues.**
 - **Will potentially add new language on two topics: Materials of Concern and Supply Chain Risk Management.**

Parts Management Tools and Data Subcommittee

Discussed Five Project Areas:

- Digital data benchmarking project. NSRP projects, Commonality Working Group, Pin Point and SWISS.
- Navy 525 Valve Commonality (Standardization/Item Reduction); explore synergies w/Pin Point data
- Pin Point Socialization: expand customer base/usage
 - Better materials, journal article, brochure, briefing opportunities; teach Pin Point at DAU; develop training
 - Increase use in DMSMS community/working group
- Pin Point / MIL-STD-3018 Parts Management Plan
- Use SWISS to support Parts Management Plan development and maintenance

Counterfeit Parts And Risk Mitigation Subcommittee

- Discussed using the Defense Parts Management Portal as a space for providing information on counterfeit mitigation efforts, a concept the DSPO Director has approved.
- This would provide a central point for information on all things counterfeit. It would be a great use of the DPMP.
- This new “portal” would link users to information on counterfeit-related standards activities, industry blogs, events, and possibly advisories and alerts.
- The subcommittee will be responsible for the content. LMI will input the data as part of regular DPMP maintenance.

Implementation Subcommittee

-
- The Implementation Team will be creating specific processes and procedures to address the requirements defined in MIL-STD-3018.
 - The intention is to replicate best practices across industry.
 - Reviewed proposed draft implementation guide with the SE, Procedures, Contracting, Education Subcommittee for general comments and feedback.
 - Discussed subcontractor management verification – new SAE Aerospace Recommended Practices (ARPs) - Part and Supplier Quality. This is a process issue, not a quality issue. Talked about use of “shall” vs. “must” vs. “will.”
 - Will conduct a tele-conference to further develop.
